Education

IAES	2022-2025
System Analyst	Puerto Rico, Misiones
Argentina Programa	2023
Full-Stack Web Development	
Pearson	2023
English Course	

Experience

Alakazam – Web App (React)	Remote, Argentina
Fullstack developer junior	October 2024 – Present
<ul style="list-style-type: none">• Collaborated in the development of a rental web application as a Fullstack Developer.• Worked with a multidisciplinary team, applying agile methodologies and using tools like React, Tailwind CSS, Material-Tailwind, TypeScript and Docker.• Actively contributed to the planning, design, and implementation of various components, while also addressing technical challenges throughout the project development process.	
Frontend Web Developer Trainee (Angular)	Remote, Spain
JRCSoftcodingSolutions	March 2024 – October 2024
<ul style="list-style-type: none">• Participated in the development of responsive web and mobile applications, ensuring optimized user experiences across different devices.• Collaborated on commercial projects using technologies like Angular, PHP, HTML5, CSS3, and Ionic Framework, integrating innovative solutions.• Contributed to the maintenance and continuous improvement of applications, enhancing efficiency and usability.• Resolved technical issues in day-to-day development, reducing response times and ensuring system functionality.	
Frontend Web Developer (Angular)	November 2023 – January 2024
Freelance Argentina	
<ul style="list-style-type: none">• Developed a client management application using Angular and Java, optimizing administrative processes across various offices.• Implemented PDF printing functionality, facilitating the automatic generation of documents and reports.• Designed and integrated a cash management system, improving daily financial control.• Installed and configured the application in multiple offices, ensuring a smooth transition and continuous technical support.	

Projects Completed

- **Racecourse Management System (Java)**

Developed a racecourse management system using Java to handle horse management, races, and related operations. Implemented a dynamic design that allows quick creation of records tailored to specific scenarios within the racecourse environment.

- **Space-Style Game (Python)**

[Link: Augustoxtmh/Juego_Python_SpaceWar](#)

Designed and developed a space-themed video game using Python with Pygame. Created an executable file to simplify its execution and enhance user experience.

- **Shared Library System (PHP)**

Developed a web-based system using PHP to enable PDF sharing and reading among users.

- **Hackathon Participation (Angular)**

Participated in a hackathon organized by Danone, showcasing design and frontend development skills using Angular.

Skills and Interests

Technical Skills:

Backend:

- Programming Languages: Python, Java, C++.
- Frameworks and Tools: Spring Boot, MySQL, Firebase.
- Technologies: JWT authentication, CRUD systems, PDF generation.

Frontend:

- Languages and Tools: TypeScript, HTML5, CSS3.
- Frameworks: React, Angular, Ionic.
- Technologies: Responsive design, Frontend development.

Others:

- Development and Management Tools: GitHub, Render, Clever Cloud, Docker, Jira, Figma.
- Software Development: Backend integration, desktop applications, SQL.

Languages:

- Spanish (Native)
- English (Intermediate, certified by Pearson)

Interests:

- Desktop development, problem-solving, web application deployment and maintenance.
